教学大纲及教学日历 SYLLABUS

15. 教学目标 **Course Objectives**

微生物在地球环境中无处不在，在维持地球生态功能稳定方面发挥着重要作用。然而，只有一小部分微生物种群被人类所认识。这节课将会介绍各种已被人类发现的生活在极端环境下的独特生命形式，并对其意义进行讨论。

Microorganisms are ubiquitous and play important roles in maintaining the ecological functions of our planet. Yet, only a small fraction of the microbial populations has been identified. This course will introduce students all sorts of extreme environments where unique life forms have been unexpectedly found. The implications of such novel organisms will also be discussed.

16. 预达学习成果 **Learning Outcomes**

能力方面：具有自主学习的能力和终身学习的意识；具有获取有关专业信息的能力，掌握中外文资料查询、文献检索及运用现代信息技术获取和表达信息的基本方法；具有不断学习和适应社会发展的能力。

知识方面：系统掌握极端环境生命的基本理论、基本知识和基本技能，了解海洋科学的知识体系和发展趋势；了解极端环境生命的前沿发展现状和趋势。掌握一门外国语及基本的信息技术；具备一定的人文和社会科学知识。

The students will gain the ability of self-motivated study for their life-time; they will be able to obtain international scientific experience, writing papers using modern information technology, and have the potential of continuous study and adaptation to the development of the society.

They will master basic theories and skills of Life in Extreme Environments, understand the science at the geological and biological frontiers, and trends in different marine ecosystems. They will develop skills in English as a foreign language, gain basic information and technology, and obtain certain background in humanities and social sciences.
