教学大纲及教学日历 SYLLABUS

15. 教学目标 Course Objectives

Specifically, this course aims to help the students:

This course is designed for intermediate students who are interested in the theoretical and systematic study of world politics. The course first introduces students to several major theoretical approaches to the study of World Politics (or International Relations), and then applies these approaches to a number of major, contemporary issues—ranging from war and peace, conflict and cooperation, development and underdevelopment to global and national interests—which have constantly drawn attention of national leaders and ordinary people in the world. Specifically, this course has five objectives:

1. To demonstrate the importance of theory for describing, explaining, and predicting international political and economic phenomena;
2. To familiarize students with the most influential and popular theoretical approaches (i.e. realism, pluralism or liberalism, and globalism or Marxism) to the study of international relations, in terms of their intellectual geneses, fundamental assumptions, major arguments, and applications;
3. To train students to think critically about global and regional issues rather than to provide them with easy answers to these issues. Critical thinking involves:
 - Distinguishing among general theoretical approaches;
 - Assessing the merits of specific theoretical arguments;
 - Developing an independent approach to the issues of international relations.
4. To examine most salient issues in world politics systematically and critically, utilizing the various theoretical approaches learned and developed in this class;
5. To familiarize students with the facts associated with major issues.

本课程首先向学生介绍研究世界政治(或国际关系)的几种主要理论方法,然后将这些方法应用于当今时代的一些主要问题:战争与和平、冲突与合作、发展与不发达关系到全球和国家利益等。具体来说,本课程有五个目标:1、论证理论对描述、解释和预测国际政治经济现象的重要性;2、使学生熟悉国际关系研究中最具影响力和流行的理论方法(即现实主义、多元主义或自由主义、全球主义或马克思主义),了解其知识来源、基本假设、主要论点和应用;3、训练学生批判性地思考全球和地区问题,批判性思维包括:对一般理论方法的区别,评估具体理论论据的价值,发展独立处理国际关系问题的方法。4、运用本课程所学的各种理论方法,系统而批判性地检视世界政治中最显著的议题,熟悉与主要问题相关的

事实。

16. 预达学习成果 Learning Outcomes

In short, it is hoped that from this course, students will come away with not only a better understanding of International Relations as one of subfields in social sciences, but also with theoretical and conceptual frameworks that they can use to discuss and comprehend major issues in the global and regional settings.

简而言之，希望通过本课程的学习，学生不仅能够更好地理解作为社会科学的分支学科之一的国际关系学，也能运用相关理论和概念框架讨论理解全球和区域视野下的重大问题，
