Department of Physics

Program of Applied Physics for International Students (2022)

I. Introduction

Applied physics is a discipline which aims at the applications of the laws of physics for developing new technologies, new functional materials, and solving some particular engineering problems. In the past century, breakthroughs in theoretical physics have triggered revolutions in modern industries, such as nuclear energy, semiconductor, superconductor, laser, aviation and aerospace, etc. At present, physics plays a great role in economy and our daily life. While in the future, progresses in areas like fusion energy, new energy materials, high temperature superconductivity, metamaterials and quantum information are expected. It is then a big challenge to transfer the latest achievements in physics to technologies and practical applications.

Southern University of Science and Technology is located in Shenzhen city which is one of the most developed areas in China. There are numbers of high-tech enterprises in the city which bring pressing needs for original innovation of technology and high-level R&D technicians and engineers. Applied physics serves as a bridge between physics and other majors like chemistry, materials science and engineering, electrical and electronic engineering, etc., in SUSTech, providing a training program of the above needs, and a platform for developing new technologies.

Academic subject area: Physics; Program code: 070202

II. Objectives and Learning Outcomes

1. Objectives

The major provides systematic applied physics training for students who can engage in research, teaching, technology development and management in Applied Physics and related science and technology fields (such as materials science, semiconductor industry, electronic information, computer industry, etc.), or who can further study in related disciplines.

2. Learning Outcomes

The students should meet the requirements of the Ministry of Education on the ideological

and political theory and moral education of undergraduates. Besides certain humanistic literacy, aesthetic literacy and social science knowledge, and establish correct labor values and attitudes, the students should acquire the following professional skills.

1. Good Mathematical Foundation

2. Mastering the Basic Theory and Principles of Physics

3. Master the methods and skills of physics experiment

4. Understanding Industrial Production Activities

5. Professional knowledge in science and Engineering

6. Ability of computer programming, application and numerical calculation

7. Good English reading, writing and communication skills

8. Good oral expression, communication and coordination skills and teamwork spirit

9. Have a certain ability to acquire knowledge independently

10. Ability of scientific spirit, innovative consciousness, theoretical application and Technological Development

III. Study Length, Degree, and Graduation Requirements

1. Study length: 4 years. The academic credit system of SUSTech allows flexible study years, but not less than 3 years or more than 6 years

2. Degree conferred: Students who complete and meet the degree requirements of the undergraduate program will be awarded a bachelor's degree in Science

3. The minimum credit requirement for graduation: 155 credits. The specific requirements are as follows.

Module		**Category**	**Minimum Credit Requirement**
General Education Courses	Chinese Language and Culture Module	Chinese Language and Culture	16
	Arts and Physical Education Module	Physical Education	4
		Arts	2
	Competence Development Module	Computer Programming	3
		Writing	2
		Chinese Studies	2
		Foreign Languages	14

		Major Core Courses	20
		Practice-based Learning (Undergraduate Thesis, Internships, Research projects, etc.)	16
	Major Elective Courses	Major Elective Courses	14
Total			155
Note: please see the General Education Requirement for more details on Chinese Language and Culture Module, Arts and Physical Education Module, Competence Development Module（Foreign Languages & Chinese Studies & Writing）, Humanities and Social Sciences Module, and Introduction to Majors Module.			

IV. Course Requirements for the Mathematics and Natural Sciences Module and Computer Programming

Course Category	Course Code	Course Name	Credits	Terms	Prerequisite	Dept.
Mathematics	MA117	Calculus I	4	1 Fall	None	Department of Mathematics
	MA127	Calculus II	4	1 Spring	Calculus I	
	MA113	Linear Algebra	4	1 Spring & Fall	None	
Physics	PHY105	College Physics I	4	1 Fall	None	Department of Physics
	PHY106	College Physics II	4	1 Spring	College Physics I	
	PHY104B	Experiments of Fundamental Physics	2	1-2 Spring & Fall	None	
Chemistry	CH105	Chemistry: The Central Science	3	1-2 Spring & Fall	None	Department of Chemistry
Biology	BIO102B	Introduction to Life Science	3	1-2 Spring & Fall	None	Department of Biology
Computer Programming (Choose one from five)	CS109	Introduction to Computer Programming	3	1-2 Spring & Fall	None	Dept. of Computer Science and Engineering
	CS110	Introduction to Java Programming	3	1-2 Spring & Fall	None	
	CS111	Introduction to C programming	3	1-2 Spring & Fall	None	
	CS112	Introduction to Python Programming Python	3	1-2 Spring & Fall	None	
	CS113	Introduction to Matlab Programming	3	1-2 Spring & Fall	None	

Note:

1. **Mathematics: MA101a Mathematical Analysis I, MA102a Mathematical Analysis II can replace MA117 Calculus I, MA127 Calculus II;**
2. **Physics: PHY101 General Physics I, PHY102 General Physics II can replace PHY105 College Physics I, PHY106 College Physics II;**
3. **Chemistry: CH103 General Chemistry can replace CH105 Chemistry: The Central Science;**
4. **Biology: BIO103 Principles of Biology can replace BIO102B Introduction to Life Sciences.**
5. **The above alternative courses are also applicable to "Prerequisites for Major Declaration".**

V. Prerequisites for Major Declaration

Major Declaration Time	Course Code		Course Name	Prerequisite
Declare major at the end of the first academic year	PHY105		College Physics I	None
	PHY106		College Physics II	College Physics I
	PHY104B		Experiments of Fundamental Physics	None
	MA117		Calculus I	None
	MA127		Calculus II	Calculus I
	MA113		Linear Algebra	None
Declare major at the end of the second academic year	PHY105		College Physics I	None
	PHY106		College Physics II	College Physics I
	PHY104B		Experiments of Fundamental Physics	None
	MA117		Calculus I	None
	MA127		Calculus II	Calculus I
	MA113		Linear Algebra	None
	Computer Programming (Choose one from five)	CS109	Introduction to Computer Programming	None
		CS110	Introduction to Java Programming	None
		CS111	Introduction to C programming	None
		CS112	Introduction to Python Programming Python	None
		CS113	Introduction to Matlab Programming	None

Note:

1. **If the number of students entering a major at the end of the first academic year in the department is greater than or equal to the total number of the teaching-research faculty (PI)*2*60%, all majors in the department may implement the prerequisites for major declaration at the end of the second academic year.**
2. **If the number of students entering a major at the end of the first academic year in the department is less than the total number of the teaching-research faculty (PI)*2*60%, all majors in the department do not implement the prerequisites for major declaration at the end of the second academic year.**
3. **Suppose the number of students applying for a major at the end of the first academic year exceeds four times the total number of the teaching-research faculty (PI), then the department may select students according to predetermined rules. In principle, the rules set by the department shall examine the students' suitability for the major and not based on weighted GPA (Specific rules shall be set by the department and announced in advance).**
4. **For departments that do not implement prerequisites for major declaration at end of the second academic year, if the cumulative number of students applying for a major at the end of the second academic year and the number of students who have entered a major at the end of the first academic year exceeds four times the total number of the teaching-research faculty (PI), the department may select students according to predetermined rules. In principle, the rules set by the department shall examine the students' suitability for the major and not based on weighted GPA (Specific rules shall be set by the department and announced in advance).**

Note:

1. **Students should report their plans of major selective courses after claiming their majors by consulting their academic advisors. The minimum credit requirement of major elective course is 14.**
2. **The courses whose course codes start with PHYS are summer semester courses. Dynamic course of summer semester may be changed depending on the situation.**
3. **Major elective courses of specific semesters may be changed according to the situation. The number of major elective courses may increase with the development of curriculum construction.**
4. **Students can study chemistry, biology, materials, electronics and other courses not being listed above according to the advice of academic advisors. The corresponding credits can be counted as elective ones after the credits certification of major elective courses in Applied Physics.**
5. **Courses with similar content can be substituted, but credits cannot be certificated repeatedly. The credit certification rules should be interpreted by the Teaching Steering Committee of the Department of Physics.**
