Department of Mechanical and Energy Engineering

Program of Mechanical Engineering for International Students

(2023)

I. Introduction

This academic program is designed to provide broad disciplinary subject training for the development of mechanical engineering. Department of Mechanical and Energy Engineering (MEE) of Southern University of Science and Technology (SUSTech) aims at becoming a world-leading center for engineering education and research. At the advanced stage of this program, three major directions are coherently blended into this program to open specialization options for students: (1) Advanced manufacturing and innovative design; (2) Equipment automation, robotics and artificial intelligence; and (3) Renewable energy engineering. More specifically, our research focuses include advanced and intelligent manufacturing methods, such as advanced forming, additive manufacturing, precision machining, multi-scale robotic mechanisms, control and automation, soft materials, and different battery engineering solutions. We cater for educating two streams of engineering talents: (1) the academic stream of talents who have strong theoretical foundation in research, interdisciplinary perspective and experience, and good humanistic understanding; (2) the engineering innovation stream talents with sharp insight into engineering problems, and strong leadership for solving them.

Academic subject areas: Mechanical Engineering; Program code: 080201

II. Objectives and Learning Outcomes

1. Objectives

The program integrates theoretical and technological education within mechanical engineering domain, and provides students with a set of solid scientific, and practically innovative courses as well as hand-on training in the field. The program aims to develop students into future leaders in the discipline with: (1) balanced training in broad fundamentals of mechanical engineering as well as yet selectively-specialized knowledge of interdisciplinary engineering; (2) outstanding ability in

engineering practice, independent thinking, integrated application of engineering knowledge; and (3) innovation capability, humanistic understanding, and a global vision.

2. Learning Outcomes

- Master basic science theories, including mathematics, physics, mechanics, materials, electronics and computer science, management science, etc.
- b) Understand and be able to apply well-established knowledge of mechanical engineering, including theories, the frontier technologies and development of the industry, scientific research methods, engineering design and manufacturing methods. Students should also appreciate the latest inter-disciplinary development of other related fields.
- c) Be able to apply innovative thinking to understand, define, model, analyze and solve problems independently.
- d) Develop an international vision and skills of cross-cultural communication and collaboration.
- e) Acquire effective communication and leadership skills in multi-disciplinary teams.
- f) Develop rigorous and realistic attitude towards science and research, effective engagement in pursuing excellence and commitment to serve humanity.
- g) Have humanistic and social science literacy, and exercise social responsibility and professional engineering ethics.
- h) Develop the ability of independent learning and the awareness of lifelong learning.

III. Study Length, Degree, and Graduation Requirements

1. Study length: 4 years.

2. Degree conferred: Students who complete and meet the degree requirements of the

undergraduate program will be awarded a bachelor's degree in Engineering.

3. The minimum credit requirement for graduation: 156 credits. The specific requirements are as follows.

| Module | | Category | Minimum Credit Requirement |
|--|---|---|--|
| | Chinese Language and Culture Module | Chinese Language and Culture | 16 |
| | | Physical Education | 4 |
| | Arts and Physical Education Module | Arts | 2 |
| | | Computer Programming | 3 |
| | Competence Development Module | Writing | 2 |
| | | Foreign Languages | 14 |
| | | Humanities | |
| | Humanities and Social Sciences Module | Social Sciences | 6 |

| Note: "/"means e | equivalent cou | rses to be selected by stude | nts. | | | |

V. Prerequisites for Major Declaration

| Major Declaration Time | Course Code | Course Name | Prerequisite | | | | | |
|---|--|---|---|--|--|--|--|--|
| | MA101a/ MA117 | Mathematical Analysis I /Calculus I | None | | | | | |
| | MA102a/ MA127 | Mathematical Analysis II /Calculus II | Mathematical Analysis I / Calculus I | | | | | |
| | PHY101/ PHY105 | General Physics I /College Physics I | None | | | | | |
| | PHY102/ PHY106 | General Physics II /College Physics II | General Physics I / College Physics I | | | | | |
| Declare major at the end of the first academic year | Note: The above courses are required to be completed. In addition, at least one of the following Course Category should be passed: Mathematics: MA113 Linear Algebra. Physics: PHY104B Experiments of Fundamental Physics. Chemistry: CH103/CH105 General Chemistry / Chemistry: The Central Science. Geoscience + Life science: BIO102B/BIO103/EOE100 Principles of Biology / Introduction to Life Science/ Introduction to Earth Sciences . Computer Programming: CS109/CS110/CS111/CS112/CS113 Introduction to Computer Programming/ Introduction to Java Programming/ Introduction to C programming/ Introduction to Python Programming Python/ Introduction to Matlab Programming. | | | | | | | |
| | MA101a/ MA117 | Mathematical Analysis I /Calculus I | None | | | | | |
| | MA102a/ MA127 | Mathematical Analysis II /Calculus II | Mathematical Analysis I / Calculus I | | | | | |
| | PHY101/ PHY105 | General Physics I /College Physics I | None | | | | | |
| | PHY102/ PHY106 | General Physics II /College Physics II | General Physics I / College Physics I | | | | | |
| Declare major at the end of the | MA113 | Linear Algebra | None | | | | | |
| second academic year | Note: The above courses are required to be completed. In addition, at least one of the following Course Category should be passed: Physics: PHY104B Experiments of Fundamental Physics. Chemistry: CH103/CH105 General Chemistry / Chemistry: The Central Science. Geoscience + Life science: BIO102B/BIO103/EOE100 Principles of Biology / Introduction to Life Science/ Introduction to Earth Sciences. Computer Programming: CS109/CS110/CS111/CS112/CS113 Introduction to Computer Programming/ Introduction to Java Programming/ Introduction to C programming/ Introduction to Python Programming Python/ Introduction to Matlab Programming. ("/"means equivalent courses to be selected by students.) | | | | | | | |
| Note: | | | | | | | | |
| If the number than or equa may implement If the number the total num the prerequis Suppose the the total num predetermine major and num | er of students en l to the total nu ent the prerequis r of students ent aber of the teach ites for major de number of stude aber of the teach de rules. In princ ot based on we | tering a major at the end of the first acade mber of the teaching-research faculty (PI) ites for major declaration at the end of the ering a major at the end of the first acader ing-research faculty (PI)*2*60%, all major sclaration at the end of the second academic nts applying for a major at the end of the ing-research faculty (PI), then the departr iple, the rules set by the department shall e ighted GPA (Specific rules shall be set | emic year in the department is greater *2*60%, all majors in the department second academic year. nic year in the department is less than rs in the department do not implement e year. first academic year exceeds four times ment may select students according to xamine the students' suitability for the by the department and announced in | | | | | |
| major and n advance). | major and not based on weighted GPA (Specific rules shall be set by the department and announced in advance). | | | | | | | |

4. For departments that do not implement prerequisites for major declaration at end of the second academic year, if the cumulative number of students applying for a major at the end of the second academic year and the

number of students who have entered a major at the end of the first academic year exceeds four times the total number of the teaching-research faculty (PI), the department may select students according to predetermined rules. In principle, the rules set by the department shall examine the students' suitability for the major and not based on weighted GPA (Specific rules shall be set by the department and announced in advance).
