Department of Mechanics and Aerospace Engineering

Program of Aerospace Engineering for International Students (2024)

I. Introduction

Academic subject areas: Aerospace

Program code: 082001

Aerospace Engineering is a modern area that exemplifies the need for interdisciplinary problem solving and the mind for innovation. Aerospace Engineering is also an area of national strategic importance and high priority for growth. The Aerospace Engineering bachelor program at SUSTech is led by the Member of Chinese National Academy of Engineering, and the faculty consists of several renowned scholars. Major areas include aircraft design and engineering, aircraft propulsion, and aircraft manufacturing. The design and analysis of Aerospace Engineering relies on solid grasp of broad subjects of mechanics, heat transfer, material science, and electronics; the proficient knowledge of these subjects are applicable in other areas such as mechanical engineering and civil engineering. The students trained by the Aerospace Engineering program are expected to establish solid foundations of mathematics and mechanics, as well as deep understanding of basic aircraft design theory, strong capabilities in structural analysis, and good hands-on skills.

II. Objectives and Learning Outcomes

1. Objectives

The Aerospace Engineering program at SUSTech is dedicated to train students of high calipers by empowering them with solid foundations of mathematics and mechanics, broad knowledge in aerospace engineering, good overall capability of aircraft design, and a mind for innovation. The students who successfully complete the program may perform consulting, research and development, planning, and management roles in the industries of aerospace engineering, mechanical engineering, and mechanics. They can also enter top universities and research institutes to pursue master or doctoral degrees.

2. Learning Outcomes

Morality and humanity. With professionalism, a firm attitude of pursuing excellence, a sound personality, a sense of social responsibility and rich humanities and sciences accomplishment.

Basic knowledge. Master the basic theoretical knowledge and skills of engineering such as mathematics, mechanics, physics, electronics, machinery and so on.

Core knowledge

Have the necessary ability of drawing, computing, experimenting and testing in this major. Through the professional curriculum design, students can initially achieve the design, control, debugging and research abilities of aircraft application system. At the same time, they have strong computer and foreign language application abilities.

Master the complete basic knowledge system of aerospace engineering, including material mechanics, engineering thermodynamics, aircraft dynamics, aerodynamics, control principle, aircraft design, aircraft turbomachinery principle, aircraft structural strength and so on.

Master the general engineering design, aircraft design, Aerial engine Design and other design methods.

Understand the frontiers of the discipline. Understand the development trends, theoretical frontiers and application prospects in the field of aerospace.

Master the basic methods of literature retrieval and data query, and have the ability to engage in scientific research and practical work.

Management ability and teamwork ability. Good organizational and management skills, good communication skills, as well as environmental adaptation, team work ability.

International vision. Has the international vision and certain international exchange and cooperation ability.

Life long learning. Have the consciousness of lifelong learning and self-learning ability, innovative consciousness and grasp the basic innovative methods.

III. Study Length, Degree, and Graduation Requirements

1. Study length: 4 years.

2. Degree conferred: Students who complete and meet the degree requirements of the undergraduate program will be awarded a bachelor's degree in Bachelor of Engineering

3. The minimum credit requirement for graduation: 160 credits. The specific requirements are as follows.

| Module | | Category | Minimum Credit Requirement |
|---------------------|---|--------------------------------------|----------------------------------|
| | Chinese Language and Culture Module | Chinese Language and Culture | 16 |
| | Arts and Physical Education | Physical Education | 4 |

IV. Course Requirements for the Mathematics and Natural Sciences Module and Computer Programming

| Course Category | Course Code | Course Name | Credits | Terms | Prerequisit e | Dept. |
|------------------------------|-------------|--|---------|------------------|----------------------|-------|
| | MA117 | Calculus I | 4 | 1Fall | None | MA |
| Mathematics | MA127 | Calculus II | 4 | 1Spring | Calculus I | MA |
| Wathematics | MA113 | Linear Algebra | 4 | 1Spring /Fall | None | MA |
| | PHY105 | College Physics I | 4 | 1Spring /Fall | None | РНҮ |
| Physics | PHY106 | College Physics II | 4 | 1Spring /Fall | General Physics I | РНҮ |
| | PHY104B | Experiments of Fundamental Physics | 2 | 1Spring /Fall | None | РНҮ |
| Chemistry | CH105 | Chemistry: the Central Science | 3 | 1Spring /Fall | None | СН |
| Geoscience + Life Science | BIO102B | Introduction to Life Science | 3 | 1Spring /Fall | None | BIO |
| Computer Programming | CS109 | Introduction to Computer Programming | 3 | 1Spring /Fall | None | CS |

Note:

1. For Mathematics Category, students can take Mathematical Analysis I and II as alternatives to Calculus I and

II; Advanced Linear Algebra I as an alternative to Linear Algebra.

2. For Physics Category, students can take General Physics I and II as alternatives to College Physics I and II.

3. For Chemistry Category, students can take General Chemistry as an alternative to Chemistry: the Central Science.

4. For Geoscience + Life Science Category, students can take Principles of Biology or Introduction to Earth Sciences as an alternative to Introduction to Life Science.

5. For Computer Programming Category, students can choose any one of the five computer programming courses.

6. The above alternative courses are also applicable to "Prerequisites for Major Declaration".

V. Prerequisites for Major Declaration

| Major Declaration Time | Course Code | Course Name | Prerequisite | |
|---|----------------|--------------------|-------------------|--|
| | MA117 | Calculus I | None | |
| Declare major at | MA127 | Calculus II | Calculus I | |
| the end of the first academic year | MA113 | Linear Algebra | None | |
| | PHY105 | College Physics I | None | |
| 5 | PHY106 | College Physics II | College Physics I | |
| | MA117 | Calculus I | None | |
| Declare major at | MA127 | Calculus II | Calculus I | |
| the end of the second academic year | MA113 | Linear Algebra | None | |
| | PHY105 | College Physics I | None | |
| | PHY106 | College Physics II | College Physics I | |

Note:

1. If the number of students entering a major at the end of the first academic year in the department is greater than or equal to the total number of the teaching-research faculty (PI)*2*60%, all majors in the department may implement the prerequisites for major declaration at the end of the second academic year.

- 2. If the number of students entering a major at the end of the first academic year in the department is less than the total number of the teaching-research faculty (PI)*2*60%, all majors in the department do not implement the prerequisites for major declaration at the end of the second academic year.
- 3. Suppose the number of students applying for a major at the end of the first academic year exceeds four times the total number of the teaching-research faculty (PI), then the department may select students according to predetermined rules. In principle, the rules set by the department shall examine the students' suitability for the major and not based on weighted GPA (Specific rules shall be set by the department and announced in advance).

4. For departments that do not implement prerequisites for major declaration at end of the second academic year, if the cumulative number of students applying for a major at the end of the second academic year and the number of students who have entered a major at the end of the first academic year exceeds four times the total number of the teaching-research faculty (PI), the department may select students according to predetermined rules. In principle, the rules set by the department shall examine the students' suitability for the major and not based on weighted GPA (Specific rules shall be set by the department and announced in advance).

VI: Major Course Arrangement

Table 1: Major Required Courses

| Course Category | Course Code | Course Name | Credits | Practice- based Learning Credits | Terms | Prerequisite | Dept. |

| Note [.] | | | | | | | |

Note:

Note 1: "Engineering Mechanics I - Statics and Dynamics MAE203B" can be replaced by "Theoretical Mechanics I MAE203".

"Engineering Fluid Mechanics MAE207" can be replaced by "Fluid Mechanics MAE303".

"Engineering Thermodynamics MAE305" can be replaced by "Thermodynamics and Statistical Physics I PHY204". Note 2: Science and technology innovation projects are carried out in any semester after the beginning of the second academic year, so they are not included in the specific weekly credit hour allocation table.

Note 3: The industrial internship is not fixed to a specific semester and therefore is not included in the specific weekly credit hour allocation table.

Note 4: Students who have completed Comprehensive Design I (COE491) and Comprehensive Design II (COE492) are not required to take the graduation design (or thesis) (MAE490).

Table 2: Major Elective Courses

| Course Code | Course Name | Credits | Practice- based Learning Credits | Terms | Prerequisite | Dept. |
