	<p>本课程由化学系开设, 面向化学专业研究生的专业选修课。开设本课程, 旨在使学生全面系统地学习碳原子与不同主族元素以及过渡金属原子间的成键理论, 相应化合物的反应特性, 以及在实践应用中的价值。另外学生还将通过本课程接触了解当今元素有机化学领域的发展前沿。本课程的学习可以提升学生元素有机化学的理论基础, 并培养学生对于科学以及研究的兴趣。</p> <p>Element-Organic Chemistry is an elective course for students majored in Chemistry, offered by the Department of Chemistry. The course aims to enable students to comprehensively and systematically study the bonding-theory of C-E and C-TM (E = main-group elements; TM = transition metals), the reactivity patterns of the corresponding compounds and their applications. In addition, the course will enable students to understand frontier development</p>	

	in the area of element-organic chemistry. It will develop students' scientific competence and their interest in science and research.
11.	教学方法及授课创新点 Teaching Methods and Innovations
	<p>课程结合课堂教学，习题讨论以及学生对于前沿领域的专题报告。</p> <p>创新点：学生可以自行选择专题报告或者期末口试。</p> <p>The course combines classroom teaching, discussion on exercises. Students are encouraged to give literature seminar. Final exam consists of oral and written examinations. The students who have given presentation on literature seminar can be exempt from oral exam.</p>
